## REDLAND BRICK INTRODUCES EXCLUSIVE SIZES IN GENUINE MOULDED CLAY PAVER COLLECTION

January 27th, 2009 – (Williamsport, MD) – Redland Brick, the nation's leading moulded brick manufacturer, has announced the availability of its new **Tuscan Collection Genuine Clay Pavers**. The **Tuscan Collection** is the first-ever wood-moulded genuine clay paver series to be available in 6" x 6" and 6" x 9" sizes.

The innovative oversized moulded clay pavers combine the rich color and durability that's unique to a genuine clay brick with the industry sizes that provide exceptional versatility in installation. The new sizes allow for more sophisticated paving bonds and patterns.

"The **Tuscan Collection** is something the paving industry has needed for many years," said Mickey Sutton, V.P. of Redland Brick. "The beauty and compressive strength of genuine clay pavers is now available in sizes that work optimally for almost any paving design and application."

Before the **Tuscan Collection**, moulded clay brick pavers were customarily offered only in the sizes of 3-5/8" x 7-5/8" (modular) or 4" x 8". Formerly, limited size offerings of clay pavers often restricted landscape architects, designers, nurseries, hardscape contractors, and homeowners in flexible design patterns and ease of installation.

The **Tuscan Collection**'s special sizes were specifically developed to provide unlimited paving design possibilities. Users will find the genuine character and lasting color of clay brick in a more usable and familiar profile.

The **Tuscan Collection** is currently machine moulded at the Rocky Ridge plant, making the pavers a perfect compliment for Rocky Ridge face brick, and also compatible with most brick structures. The pavers are currently available in four popular Rocky Ridge colors: King William, Rustique, Cumberland, and Bayshore. Additional colors will be added in 2009.

The new **Tuscan Collection** is available through Redland Brick's nationwide distributor and dealer network.

*King William*

*Rustique*

*Cumberland*
